TERMS AND CONDITIONS OF SALE

TERMS OF PAYMENT:

1. **Cash Plan.** Whereby we book the order, reserve the stock, notifying you a few days prior to shipping time when remittance can be sent and shipment will be forwarded promptly. This cash plan earns 3% discount and free boxing. This is equivalent to between 6 and 8% profit on the goods before you receive them.
2. **Partial Payment Plan.** Whereby 1/3 amount of order is remitted in advance and the balance goes forward freight or express C. O. D. payable at destination.
3. **Charge Account Plan.** Goods will be shipped on charge account only to customers of approved credit who supply satisfactory trade and bank reference allowing time for investigation. All charge accounts 30 days net.

CONDITIONS—We accept all orders upon condition that they shall be void should any injury befall stock from causes over which we have no control. At the moderate price at which we sell our goods we give no warranty except genuineness, expressed or implied. The purchaser assuming all risk and responsibility of the transportation, planting, growth and life of stock. Our responsibility ceases when goods are turned over to carriers. Prices do not include any guarantee as to growth.

BOXING AND PACKING—Boxing and packing will be charged for at actual cost of material used. We make no charge for delivery to the railroad station.

RATES—Five of same variety and size at the ten rate. Fifty of the same variety and size at the 100 rate. Five hundred of the same variety and size at the 1,000 rate.

PRICES—Are limited to Spring 1921, and supersede all previous lists and ARE SUBJECT TO CHANGE WITHOUT NOTICE.

CLAIMS—For any cause will receive consideration only when made within 5 days after the arrival of goods.

SPECIAL NOTICE—Correspondents are requested to use their printed business letterheads. This list is for wholesale customers only and in justice to our wholesale customers we use every possible effort to limit distribution of wholesale prices to those we know to be entitled to receive them. USE PRINTED STATIONERY.

LOCATION—We are situated in Northern Illinois, on well drained, rich, fertile soil, located forty-two miles northwest of Chicago. Visitors are always welcome. For complete directions for reaching Nursery see page 24.

NOTE:—Prices in this catalog are wholesale prices. To those interested we will send free on request our 68 page retail descriptive and illustrated catalog.

A Bird's Eye View of the Hill Nursery

Specimen Evergreen Showing Hill
Method of Ball and Burlap

Hill's Specimen Evergreens for Landscape Work

Those whose trade demands the use of high class planting material, will find Hill's Specimen Evergreens just suited for their needs.

Every Hill Specimen Evergreen is carefully hand dug leaving a large solid earth ball about the roots, which is securely burlapped. Our soil contains just enough clay so the earth ball remains intact. This makes it possible for us to ship long distances by Freight with excellent results.

Hill's Specimen Evergreens have been several times transplanted and root-pruned, are grown in wide rows, and have been trimmed and staked. In fact every tree has been given individual attention in order to produce the best trees possible to grow.

SPECIMEN EVERGREENS

Variety		Each	10
Abies Balsamea (Balsam Fir)			
The characteristic odor of the Northern woods is chiefly, if not solely, due to this Fir. The foliage is very fragrant, young growths often being used for making the favorite "Balsam Pillows." Makes a handsome lawn specimen. Our stock is grown from a carefully selected strain of seed gathered in certain sections in Northern Canada, insuring hardiness and trueness to type.			
2-3 feet xxx Heavy Specimens—Solid Balls—B&B	-----	\$2.75	\$22.50
3-4 " xxx " " " " "	-----	3.50	27.50
4-5 " xxx " " " " "	-----	4.50	40.00

Abies Tsuga Canadensis (Hemlock)

The value of our strain of Hemlocks is based on seed selection from Northern sources only, insuring hardiness and free graceful upright growth. In the past, European grown plants were mainly propagated from Southern collected seed (from the Carolinas, Tennessee, etc.), because the seed was cheap and easily obtainable. In addition to producing a rather inferior type of tree, when brought to colder climates, it always winter scalded, turned a ragged brown, or killed outright. Our Hemlocks are warranted the genuine Northern strain, and will be found superior to other offerings on the market.

2-3 feet xxx Heavy Specimens—Solid Balls—B&B	-----	3.50	30.00
3-4 " xxx " " " " "	-----	4.50	40.00
4-5 " xxx " " " " "	-----	5.50	50.00
5-6 " xxx " " " " "	-----	7.00	60.00

Abies Concolor (Concolor Fir)

We are careful to obtain our seed supply from Northern Colorado, producing trees of absolute hardiness with striking foliage varying in color from light green to deep soft blue with medium short needles. The strain of Concolor from New Mexico, where seed is cheap and always abundant is much inferior, inclined to winter kill and is of rather straggly open appearance. Long-lived, growing 60 to 80 feet high thriving well under all conditions.

1½-2 feet xxx Heavy Specimens—Solid Balls—B&B	-----	2.50	20.00
2-3 " xxx " " " " "	-----	4.25	37.50
3-4 " xxx " " " " "	-----	6.00	55.00

6-7 " xxx " " " " "	-----	13.00	120.00
7-8 " xxx " " " " "	-----	17.50	160.00

Abies Douglassi (Douglas Fir)

Our plants are the type from Northern Colorado, the seed being collected in deep gorges of high altitudes where the blue and silvery foliage is characteristic, being compact and symmetrical in growth, with rather short needles, in contrast to Southern Colorado and New Mexico type which are of doubtful hardiness, irregular and open growing. This tree was originally discovered by Archibald Menzies, 1792, and rediscovered by David Douglas, the eminent Scotch explorer in 1827 and introduced by him in the following year. It was shortly after named for him to commemorate his memory. A tree that is widely known and appreciated in both Europe and America.

SPECIMEN EVERGREENS—Continued

Variety		Each	10
Juniperus Virginiana Glauca			
In this variety, the whole of young growths are of almost silvery whiteness, which changes to pale glaucous green in winter. The Juniper Glauca is foremost among the interesting groups of Junipers that have been developed from the Juniperus Virginiana (Red Cedar). We constantly strive to improve our strain by careful selection and reproduce only the best types, most true to form, color, compactness and habits of growth. In grafting this tree, we are careful to use for understocks only the dependable Red Cedar, insuring hardness and longevity.

Picea Alba (White Spruce)

Described by Bailey, the eminent horticulturist, as "A Native of the Northern Parts of America." Derives the name White Spruce due to its light frosty green foliage, slightly tinged with blue. Thrives to the best advantage in the colder climates, north of Philadelphia or St. Louis. Although native throughout a wide range, the best types prevail throughout Northern Wisconsin, from where our seed is gathered from carefully selected grounds.

Dwarf Mountain Pine (Pinus Mugho)

Our Pinus Mugho is the genuine true dwarf type, many stemmed, compact, with good dark green color.

SPECIMEN EVERGREENS—Continued

Variety					Each	10
Picea Canadensis (Black Hill Spruce)						
Somewhat similar and closely related to White Spruce, but much more symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota and first introduced into commercial culture by Mr. D. Hill many years ago, since which time it has been fully tested in all parts of the country and found satisfactory. Foliage varies from green to bluish tint. Found entirely satisfactory north of St. Louis and Philadelphia.

Picea Excelsa (Norway Spruce)

As the Norway Spruce prevails over a wide range of territory in Europe, there are naturally many sources from which to obtain seed. Our careful experiments and close study of this situation for many years has proven conclusively that seed from French and German sources are unreliable for U. S. A. conditions. The French and German seed is easily obtainable and low in price, usually from 75c to \$1.00 per pound, but the really superior type of Norway Spruce exactly suited to U. S. A. conditions comes from high elevations in the Swiss Alps and is always scarce and high in price, usually costing from \$4.00 to \$6.00 per pound. The exclusive use of this seed by us insures a really superior type of Norway Spruce exactly suited to U. S. A. conditions.

3-4	" xxx " " " " "	-----	16.50	150.00

Pinus Austriaca (Austrian Pine)

Is sometimes called Black Pine. Has rich glossy dark green foliage. Well adapted for planting in Cities, as it is highly resistant to smoke. Its native home is in the lower provinces of Austria and also the Northern half of the Balkan Peninsula. A fast growing, dense tree of wonderful adaptability. For years we have secured our seeds from original sources in Austria, but since the war are now using carefully selected home grown seed which has proven as satisfactory or even more so than the imported seed. It is a sparse tap-rooted Pine, but transplants quite satisfactorily if moved late in the Fall or early Spring.

2-3	feet xxx Heavy Specimens—Solid Balls—B&B	-----	3.00	27.50
3-4	" xxx " " " " "	-----	4.25	37.50

Pinus Banksiana (Jack Pine)

Fast growing Pine well adapted to rough gravelly and sandy locations. Not particularly recommended for ornamental use, but largely for planting on dry sandy soils and hot climates such as certain sections of Nebraska, Kansas and the Dakotas. Grows and thrives on barren soils where other trees could not live.

2-3	feet xxx Heavy Specimens—Solid Balls—B&B	-----	2.00	16.50

Pinus Mugho (Dwarf Mountain Pine)

Our Pinus Mugho is the genuine true dwarf type, many stemmed, compact, with good dark green color, which it retains throughout the winter. Many inferior forms of this variety offered as Pinus Mugho, are on the market, some of which are loose, open growers and some of upright, irregular habit. The strain we offer is the true dwarf, compact type, and the seed (from the Riesenberg Range in Silesia), is obtainable only at great expense in small quantity, because of its scarcity. When obtainable, the true seed costs as high as \$15.00 per pound, in contrast to \$1.50 per pound for the common form. Rarely grows over 3 to 6 feet high.

1-1½	feet xxx Heavy Specimens—Solid Balls—B&B	-----	2.25	17.50
1½-2	" xxx " " " " "	-----	2.75	22.50

Pinus Ponderosa (Ponderosa Pine)

Sometimes called Bull Pine or Western Yellow Pine. The most widely distributed Evergreen of North America. The type found growing in the Black Hills of South Dakota, from where we obtain our seed, is a much superior type, being a hardy, free upright grower. Very deep rooted and drought resistant. It is a handsome, ornamental tree, with interesting long needles.

2-3	feet xxx Heavy Specimens—Solid Balls—B&B	-----	2.75	22.50

8-9 " xxx " " " " "-----	10.00	90.00

Pinus Sylvestris (Scotch Pine)

The Scotch Pine has a greater geographical distribution than any other Pine. It is spread over the whole of Europe including the British Isles, and in Asia it occurs throughout nearly the whole of that part of the continent comprised within the Russian Dominions. As a result of this wide range, many different forms are prevalent, many of which are inferior and not suited to the conditions of the American States. We obtain our seed from Sweden where this form grows best and exactly suited to American conditions, in contrast to seed from Southern Germany which is low in price, abundant, but produces very inferior stock. We pay as high as \$7.50 per pound to obtain the choice Swedish seed when the German seed is selling on the market for \$1.50 per pound.

2-3 feet xxx Heavy Specimens—Solid Balls—B&B-----	2.25	18.50
3-4 " xxx " " " " "-----	3.00	25.00
4-5 " xxx " " " " "-----	3.50	30.00

Pinus Tanyosha (Table Pine)

A really distinct and valuable variety, lately introduced by us from Japan, its native home. Forms a low growing flat top tree. Delicate light green foliage, an interesting acquisition. It is destined to become more popular when better known.

1½-2 feet xxx Heavy Specimens—Solid Balls—B&B-----	6.00	55.00
--	------	-------

Taxus Canadensis (American Yew)

A valuable dwarf Evergreen, seldom ever growing more than two or three feet above the ground. Has densely clothed dark green foliage. Particularly beautiful in autumn when loaded with scarlet colored fruits. Thrives well in shade. Can be trimmed to any desired shape. Very hardy. Sometimes called Canadian Yew.

1-1½ feet xxx Heavy Specimens—Solid Balls—B&B-----	3.00	27.50
--	------	-------

Taxus Cuspidata Brevifolia (Dwarf Japanese Yew)

Similar to *Taxus Cuspidata* but is very dwarfish and compact growing. The foliage consists of little bunches of black green foliage. Of irregular and picturesque outline, ultimately becoming 2 to 3 feet high and 5 or more feet wide. Absolutely hardy. It retains its rich dark green color, entirely throughout the winter, which added to its other points of superiority, makes it one of the most valuable Yews. Can be used for low, irregular hedge to separate one garden from another. Grows so slowly in height and keeps in such good condition, that it should be considered as the permanent plant in many mixed groups. In time it will become as much the pride of the owner as the old Dwarf Boxwood, for it has the same velvety and billowy outline as the Dwarf Boxwood when 50 to 100 years old, with the advantage of being hardier. On a visit of Prof. Sargent, director of the Arnold Arboretum at Jamaica Plain, Massachusetts, to our nurseries in 1915, he was greatly impressed with the fine appearance of our stock of this valuable variety, and mentioned especially about its absolute hardiness and adaptability to all American conditions, also the probability of its great popularity, and we are trying to carry out his recommendation to propagate this variety as fast as possible.

An Unusual But Attractive Border Planting of Evergreens

SPECIMEN EVERGREENS—Continued

Variety		Each	10
Taxus Cuspidata (Japanese Yew)			
A distinctly valuable Yew, growing 40 to 50 feet high. Under cultivation, somewhat smaller. Has been cultivated throughout Japan from time immemorial, and introduced into America many years ago, having taken its place as one of the most noteworthy and valuable on the entire list, originating in the cold high altitudes of Northern Japan from where we obtain our seed. It is found fully able to successfully withstand extremes of heat and cold in America. Grows close, upright and compact. Foliage dark green, fruit bright scarlet.			
1-1½ feet xxx	Heavy Specimens—Solid Balls—B&B-----	\$3.00	\$27.50
1½-2 " xxx	" " " " " " " "-----	3.50	30.00
Thuya Occidentalis (American Arbor Vitae)			
Being the leading and popular Evergreen hedge plant, we grow this variety in large quantities and can furnish twice transplanted sizes in car load lots. This species is also used as an understock for grafting all the different varieties of Thuya. For this purpose the heavier grades of seedlings or the once transplanted size is mainly used. Our annual culture of seedlings reaches several hundred thousand. Growing over such a wide range in its native growths, some trees are open growing and undesirable, but we are careful to obtain our seed from Northern Wisconsin, producing stock of absolute hardness, good green color and compact habit of growth.

A really valuable Golden form originated by Robert H. Douglas. A good golden color, not so bright as Peabody's, but a superior grower forming a broad, bushy, heavy specimen.			
1½-2 feet xxx	Heavy Specimens—Solid Balls—B&B-----	2.75	22.50
2-3 " xxx	" " " " " " " "-----	3.25	30.00
Thuya Occidentalis Douglassi Pyramidalis			
A comparatively new variety, chiefly valuable on account of its crested foliage, deep dark green in color. Reaches a height of 12 to 15 feet.			
1½-2 feet xxx	Heavy Specimens—Solid Balls—B&B-----	2.75	25.00
2-3 " xxx	" " " " " " " "-----	3.25	30.00
Thuya Occidentalis Lutea (Peabody's Golden Arbor Vitae)			
A distinct golden type, which we have been able to improve considerably by closer selection, propagating only the brightest golden color, producing plants of exceptional merit. Rather slender in habit, reaching 12 to 15 feet high with a diameter of 2 to 2½ feet.			
1-1½ feet xxx	Heavy Specimens—Solid Balls—B&B-----	2.25	18.50
1½-2 " xxx	" " " " " " " "-----	2.50	22.50
2-3 " xxx	" " " " " " " "-----	3.25	27.50
Thuya Occidentalis Pyramidalis (Pyramidal Arbor Vitae)			
Unfortunately many inferior types are on the market. Our carefully selected strain which we have improved through years of careful selection and propagation, is of noteworthy value, being the genuine narrow pyramidal type, retaining its deep green color, summer and winter. It is an especially hardy, vigorous grower, forming a compact, narrow column of dense, dark green foliage. (Please note that our strain of Pyramidal Arbor Vitae does not brown, but retains its bright green color throughout the entire year.)			
2-3 feet xxx	Heavy Specimens—Solid Balls—B&B-----	2.75	22.50
3-4 " xxx	" " " " " " " "-----	3.25	27.50
Thuya Occidentalis Wareana Siberica			
This well known variety is well worthy of its wide popularity, combining as it does excessive hardness, regular conical outline, and a peculiar dark green and remarkably dense foliage. Very compact.			
1½-2 feet xxx	Heavy Specimens—Solid Balls—B&B-----	3.25	27.50
2-3 " xxx	" " " " " " " "-----	3.75	32.50
3-4 " xxx	" " " " " " " "-----	4.75	42.50
Thuya Occidentalis Woodwardi (Woodward's Globe Arbor Vitae)			
Without doubt one of the best globe forms on the list. Originated and introduced by Mr. Jacob Manning, Proprietor of the Reading Nurseries, Reading, Massachusetts, and named after his son, J. Woodward Manning. A few plants presented by the introducer shortly before his death, to D. Hill, forms the basis of our stock. Therefore, we can justly say that our stock is the true strain.			
1x1 foot xxx	Heavy Specimens—Solid Balls—B&B-----	2.75	25.00
15x15 inch xxx	" " " " " " " "-----	3.25	30.00
Tsuga Canadensis (Hemlock) True Northern Type			
Owing to the fact that the botanical name of Hemlock is known to some as Abies and others as Tsuga, we have listed under both, and the description under Abies Tsuga Canadensis on page 3 will apply equally to this.			
2-3 feet xxx	Heavy Specimens—Solid Balls—B&B-----	3.50	30.00

Hill's Choice Evergreens

It has been our steadfast purpose for over 65 years, to continually select and seek out better, hardier types; and improve existing forms. There is in almost every instance, trees and shrubs of distinctly more desirable habits, outline color or hardiness, for those who seek it out. In our search for seeds, which we assemble from the four corners of the earth, we are continually striving to obtain stocks that are better adapted to U. S. A. conditions. Through careful selection we constantly strive to improve the strains by reproducing only those truest to type. This is a service we are proud to offer to those who recognize the significance of this vital matter.

Variety

10

100

1000

Abies Balsamea (Balsam Fir)

The characteristic odor of the Northern woods is chiefly if not solely due to this Fir. The foliage is very fragrant, young growths often being used for making the favorite "Balsam Pillows." Makes a handsome lawn specimen. Our stock is grown from a carefully selected strain of seed gathered in certain sections in Northern Canada, insuring hardiness and trueness to type.

4-6 inch o 3 yr. From Seedling Beds-----	\$-----	\$ 6.00	\$ 45.00
6-10 " xx Twice Transplanted—From Field Rows-----	2.75	20.00	-----
10-12 " xx " " " " " "-----	3.00	25.00	-----
12-18 " xx " " " " " "-----	3.75	30.00	-----

Abies Balsamea Macrocarpa (Long-needed Balsam Fir) New Type

This form was discovered in 1866 by a nurseryman named John Wilcox, living near Omro, Wisconsin. Described by Prof. Sargent as an exceptionally beautiful and desirable Fir, having unusually long needles and retaining its lower branches with tenacity. Cones larger than the common form.

4-6 inch o 3 yr. From Seedling Beds-----	-----	6.50	50.00
--	-------	------	-------

Abies Tsuga Canadensis (Hemlock)

The value of our strain of Hemlocks is based on seed selection from most northern sources only, insuring hardiness and free graceful upright growth. In the past, European grown plants were mainly propagated from southern collected seed (from the Carolinas, Tennessee, etc.), because the seed was cheap and easily obtainable. In addition to producing a rather inferior type of tree, when brought to colder climates, it always winter scalded, turned a ragged brown, or killed outright. Our Hemlocks are warranted the genuine Northern strain, and will be found superior to other offerings on the market.

6-8 inch x Once Transplanted—Bedded Stock-----	-----	18.00	165.00
8-10 " x " " " " " "-----	-----	20.00	185.00

Abies Concolor (Concolor Fir)

We are careful to obtain our seed supply from Northern Colorado, producing trees of absolute hardiness with striking foliage varying in color from light green to deep soft blue with medium short needles. The strain of Concolor from New Mexico, where seed is cheap and always abundant is much inferior, inclined to winter kill and is of rather straggly open appearance. Long-lived, growing 60 to 80 feet high, thriving well under all conditions.

12-18 inch xx Twice Transplanted—From Field Rows-----	4.50	35.00	-----
---	------	-------	-------

Abies Douglassi (Douglas Fir)

Our plants are the type from Northern Colorado, the seed being collected in deep gorges of high altitudes where the blue and silvery foliage is characteristic, being compact and symmetrical in growth, with rather short needles, in contrast to Southern Colorado and New Mexico type which are of doubtful hardiness, irregular and open growing. This tree was originally discovered by Archibald Menzies, 1792, and rediscovered by David Douglas, the eminent Scotch explorer in 1827 and introduced by him in the following year. It was shortly after named for him to commemorate his memory. A tree that is widely known and appreciated in both Europe and America.

4-6 inch o 3 yr. From Seedling Beds-----	-----	4.00	30.00

12-18 " xx " " " " "-----	4.00	30.00	-----
18-24 " xx " " " " "-----	4.50	40.00	-----

Abies Douglassi Frazeri

From the Frazier River, British Columbia. Rapid Growing and Very Hardy.

4-6 inch o 3 yr. From Seedling Beds-----	-----	7.50	-----
--	-------	------	-------

Biota Orientalis (Chinese Arbor Vitae)

We have been growing this variety successfully for many years. Our plants are propagated from seed obtained in northern China, insuring the genuine pure strain, best adapted for planting in Southeastern, Southern and Pacific Coast States.

4-6 inch o 2 yr. From Seedling Beds-----	-----	4.50	35.00
6-8 " o 2 yr. " " " "-----	-----	5.00	45.00
10-12 " xx Twice Transplanted—From Field Rows-----	4.50	35.00	-----

Cedrus Atlantica (Mt. Atlas Cedar)

A variety somewhat tender, but well adapted for planting in the Southern and Eastern states or sections with rather mild climate, of rapid growth with striking glaucous foliage.

1-2 inch o 1 yr. From Seedling Beds-----	-----	10.00	-----
--	-------	-------	-------

Ginkgo Biloba (Maiden Hair Tree)

Popularly so named owing to its resemblance to the Maiden Hair Fern. One of the oldest trees in existence. Leaf bearing, yet a conifer, considerably planted in Washington, D. C., as a street tree. Grows 60 to 80 feet.

4-6 inch o 1 yr. From Seedling Beds-----	-----	10.00	-----
--	-------	-------	-------

Juniperus Chinensis Mascula

A valuable variety from China and Japan growing 60 to 70 feet high and long recognized as one of the most desirable forms. There are two forms distinguished as Mascula and Femina, the first being the most desirable as an ornamental plant, from which our trees are propagated.

4-6 inch x Once Transplanted—Bedded Stock-----	-----	20.00	-----
--	-------	-------	-------

o—Indicates never Transplanted. Suitable for Bedding Out.
Each x—Indicates one Transplanting.

EVERGREENS—Continued

Variety	10	100	1000
Juniperus Canadensis (J. Communis) (J. Comm. Depressa)			
The well known valuable, many-stemmed Dwarf Juniper. Rarely exceeds 2 feet in height, good form of Juniper for ground cover. It is at home on sandy or gravelly hill sides fully exposed to the sun, where single plants often reach 15 feet or more in diameter. Is sometimes catalogued as <i>Juniperus Communis</i> which is erroneous. The name <i>Juniperus Communis Depressa</i> is also applied which is a synonym. Grows native in various sections of the country, but we obtain our seed from Northern Wisconsin, which is the superior type.			
4-6 inch o 2 yr. From Seedling Beds-----	\$----	\$ 7.00	\$ 60.00
6-8 " o 2 yr. " " "-----	----	8.50	75.00

8-10 " x " " "-----	----	20.00	185.00
10-12 " xx Twice Transplanted—From Field Rows-----	6.50	50.00	-----
Juniperus Communis (English Juniper)			
Good upright grower, narrow, pyramidal form, light green foliage. Very popular.			
4-6 inch o 2 yr. From Seedling Beds-----	-----	5.00	45.00
18-24 " xx Twice Transplanted—From Field Rows-----	6.00	45.00	-----
2-3 feet xx " " "-----	7.50	60.00	-----
Juniperus Communis Depressa (See Juniperus Canadensis)			
Juniperus Sabina Horizontalis			
An interesting type of Sabina produced from seed we procured from Russia for the first time in 1916, of absolute hardness. Three distinct types are noticeable, some procumbent, others semi-dwarf having interesting variations in foliage. Possesses wonderful possibilities and should be given a trial by every one interested in Conifer culture. Our stock is limited.			
4-6 inch o 3 yr. From Seedling Beds-----	-----	12.00	100.00
6-8 " (Spread) x Once Transplanted—Bedded Stock-----	-----	25.00	-----
10-12 " xx Twice Transplanted—From Field Rows-----	5.50	40.00	-----
Juniperus Sabina Variegata			
Differs from the parent form in its more dwarf and denser habit in having the tips of its younger growth creamy white. Thus the plant has a checkered appearance which renders it a useful subject for the rock garden.			
6-8 inch x Once Transplanted—Bedded Stock-----	-----	25.00	-----
Juniperus Scopulorum (Hill's Silver Juniper) New			
Neat pyramidal habit, fine silvery blue. New introduction—from the Rocky Mountains, very choice and valuable. Grows from cuttings or seedlings. For illustration see page 23.			
4-6 inch o 2 yr. From Seedling Beds-----	-----	15.00	-----
1½-2 feet xx Balled and Burlapped----- (\$3.50 Ea.)	30.00	-----	-----
2-3 " xx " " "----- (\$4.50 Ea.)	40.00	-----	-----

RED CEDAR (*Juniperus Virginiana*)

Platte River Type—Very Uniform

Pyramidal habit, dark green to bluish foliage. Our stock is the hardy northern strain. One of the most useful and characteristic trees of our American landscapes, rivaling the Italian Cypress in beauty. Adapted for planting in all sections of the country. The propagation of this valuable Conifer has been a specialty with us for many years and we exercise great care in the selection of our strain of seed. Also used as an understock for grafting Junipers.

	10	100	1000
4-6 inch o 2 yr. From Seedling Beds-----	\$----	\$ 3.00	\$ 20.00
6-8 " o 3 yr. " " "-----	-----	4.00	25.00
10-12 " xx Twice Transplanted—From Field Rows--	2.50	20.00	180.00

2-3 feet xx " " "-----	6.00	45.00	430.00

Larix Europea (European Larch)

A deciduous Conifer and a perfectly hardy upright grower, reaching large size. In the Spring when it is covered with its new soft green foliage, it is a very beautiful and striking object. We obtain our seed from Scotland where the best type is found.

Variety	10	100	1000
10-12 inch o 2 yr. From Seedling Beds-----	\$----	\$ 3.50	\$25.00
12-18 " o 3 yr. " " "-----	-----	4.00	30.00

Pachysandra Terminalis (Japanese Spurge)

A splendid Evergreen ground cover with thick glossy foliage, forming a dense mat, making low growing cover plant, excellent for edging. Does well in dense shade. Hardy.

4-6 inch x Once Transplanted—Bedded Stock-----	-----	8.00	70.00
--	-------	------	-------

Picea Alba (White Spruce)

Described by Bailey, the eminent horticulturist, as "A Native of the Northern parts of America." Desires the name White Spruce due to its light frosty green foliage, slightly tinged with blue. Thrives to the best advantage in the colder climates, north of Philadelphia or St. Louis. Although native throughout a wide range, the best types prevail throughout Northern Wisconsin, where our seed is gathered from carefully selected grounds.

2-4 inch o 2 yr. From Seedling Beds-----	-----	4.00	30.00
4-6 " o 3 yr. " " "-----	-----	5.00	35.00
6-8 " x Once Transplanted—Bedded Stock-----	-----	10.00	90.00

o—Indicates never Transplanted. Suitable for Bedding Out. Each x—Indicates one Transplanting.

EVERGREENS—Continued

Variety	10	100	1000
Picea Canadensis (Black Hill Spruce)			
Somewhat similar and closely related to White Spruce, but much more symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota and first introduced into commercial culture by Mr. D. Hill many years ago, since which time it has been fully tested in all parts of the country and found satisfactory. Foliage varies from green to bluish tint. Found entirely satisfactory north of St. Louis and Philadelphia.			
4-6 inch o 3 yr. From Seedling Beds -----	\$-----	\$ 6.00	\$50.00
6-10 " xx Twice Transplanted—From Field Rows-----	2.75	20.00	-----
10-12 " xx " " " " " -----	4.00	30.00	-----
12-18 " xx " " " " " -----	5.00	40.00	-----

Picea Engelmanni (Engelman Spruce)

One of the natives of the Rocky Mountains of Colorado. Resembles *Picea Alba* more than it does its near neighbor *Picea Pungens*, being of finer foliage and not such stiff branches as the latter. It is one of the few Conifers that will stand the severe cold of St. Petersburg, Russia, but on our Western prairies it soon loses its lower branches, as it seems to be unable to withstand the hot and drying winds of that section in late summer and early autumn. In the Eastern states, however, it does not have this fault, as the cooler and more humid air seems to agree with it better.

4-6 inch o 3 yr. From Seedling Beds -----	-----	5.00	45.00
6-10 " xx Twice Transplanted—From Field Rows-----	2.75	20.00	-----
10-12 " xx " " " " " -----	4.00	30.00	-----

NORWAY SPRUCE:**(Picea Excelsa)**

We are growers on the very largest scale of this popular fast growing Evergreen. Seedlings are produced in million lots and our annual transplantings now exceed over 500,000 plants every year. Chiefly valuable for screen and farm windbreak planting in the standard grades of twice transplants 10-12 inch, 12-18 inch, 18-24 inch and 2-3 feet. Car-load lots a specialty. With the growing scarcity of wild forest Xmas trees, this tree is also rapidly becoming popular for this purpose. As the Norway Spruce prevails over a wide range of territory in Europe, there are naturally many sources from which to obtain seed. Our careful experiments and close study of this situation for many years has proven conclusively, that seed from French and German sources are unreliable for U. S. A. conditions. The French and German seed is easily obtainable and low in price, usually from 75c to \$1.00 per pound, but the really superior type of Norway Spruce exactly suited to U. S. A. conditions comes from high elevations in the Swiss Alps and is always scarce and high in price, usually from \$4.00 to \$6.00 per pound. The exclusive use of this seed by us insures a really superior type of Norway Spruce exactly suited to U. S. A. conditions.

	10	100	1000
4-6 inch o 3 yr. From Seedling Beds (10M, \$190.00) -----	\$-----	\$ 3.00	\$ 20.00

Variety	10	100	1000
Picea Pungens (Colorado Blue Spruce)			
A leading specialty with us. The stock offered below is nursery run, containing both blue and green trees. Our careful collection of seed from the bluest trees insures an unusually high percentage of blue trees. Many authorities agree that the selected seedling trees (compared to grafted trees) are more satisfactory, and eventually make much finer specimens. We obtain our seed from the Colorado Rockies, the blue forms being glistening silvery blue in color. This handsome Spruce was discovered on Pikes Peak, by Dr. Parry in 1862.

Picea Rubra (Red Spruce)

A tree growing to 80 feet with short and slender branches forming a narrow pyramidal head. Range from N. Carolina to Canada along the Alleghany Mountains. Handsome tree, but requires cool and moist situation, and is less drought enduring than most others.

2-4 inch o 3 yr. From Seedling Beds -----	-----	3.00	20.00
---	-------	------	-------

Picea Sitchensis (Sitka Spruce) (Picea Menziesi) Areoplane Spruce

This variety first became known to science through Archibald Menzies who discovered it on the shores of Puget Sound in 1793. Is confined to a narrow belt extending many hundreds of miles along the Pacific Coast from Alaska southward to Cape Mendocino in California. Described by Prof. Sargent in his *Silva of North America* as one of the most impressive and beautiful objects in temperate North America.

4-6 inch o 3 yr. From Seedling Beds -----	-----	5.00	45.00

o—Indicates never Transplanted. Suitable for Bedding Out.

Each x—Indicates one Transplanting.

EVERGREENS—Continued

Variety	10	100	1000
Pinus Austriaca (Austrian Pine)			
Is sometimes called Black Pine. Has rich glossy dark green foliage. Well adapted for planting in Cities, as it is highly resistant to smoke. Its native home is in the lower provinces of Austria and also the northern half of the Balkan Peninsula. A fast growing, dense tree of wonderful adaptability. For years we have secured our seeds from original sources in Austria, but since the war are now using carefully selected home grown seed which has proven as satisfactory or even more so than the imported seed. It is a sparse tap-rooted Pine, but transplants quite satisfactorily if moved late in the Fall or early Spring.			
4-6 inch o 3 yr. From Seedling Beds	\$----	\$ 6.00	\$ 50.00

Variety	10	100	1000
Pinus Ponderosa (Ponderosa Pine)			
Sometimes called Bull Pine, or Western Yellow Pine. The most widely distributed Evergreen of North America. The type found growing in the Black Hills of South Dakota, from where we obtain our seed, is a much superior type, being a hardy, free upright grower. Very deep rooted and drought resistant. It is a handsome ornamental tree with interesting long needles.			
4-6 inch o 2 yr. From Seedling Beds	\$----	\$ 3.00	\$20.00
6-8 " x Once Transplanted—Bedded Stock	-----	8.00	60.00
10-12 " xx Twice Transplanted—From Field Rows	3.50	20.00	-----
12-18 " xx " " " " " "	4.00	25.00	-----
Pinus Rigida (Pitch Pine)			
Tree of medium size. Hardy, grows on dry and sterile soil. As an ornamental tree, may be used on dry and rocky slopes where it becomes very picturesque when older.			
4-6 inch o 2 yr. From Seedling Beds	-----	3.00	22.50
Pinus Strobus (White Pine)			
The great, well known American timber tree and long used as an ornamental. Grows to large size of regular, symmetrical growth.			
4-6 inch o 2 yr. From Seedling Beds	-----	3.25	22.50
6-8 " o 3 yr. " " " " " "	-----	4.00	25.00
12-18 " xx Twice Transplanted—From Field Rows	2.75	15.00	-----
18-24 " xx " " " " " "	3.50	25.00	-----
2-3 feet xx " " " " " "	4.00	30.00	-----
Pinus Sylvestris (Scotch Pine)			
The Scotch Pine has a greater geographical distribution than any other Pine. It is spread over the whole of Europe including the British Isles, and in Asia it occurs throughout nearly the whole of that part of the continent comprised within the Russian Dominions. As a result of this wide range, many different forms are prevalent, many of which are inferior and not suited to the conditions of the United States. We obtain our seed from Sweden where this form grows best and exactly suited to American conditions, in contrast to seed from Southern Germany which is low in price, abundant, but produces very inferior stock. We pay as high as \$7.50 per pound to obtain the choice Swedish seed when the German seed is selling on the market for \$1.50 per pound.			
4-6 inch o 3 yr. From Seedling Beds	-----	3.25	22.50
6-8 " o 3 yr. " " " " " "	-----	3.00	25.00

Retinospora Filifera			
Has long thread-like branches, very pendulous, of a consistent bright green. Semi-hardy.			
8-10 inch x Once Transplanted—Bedded Stock	-----	20.00	-----

o—Indicates never Transplanted. Suitable for Bedding Out.

Each x—Indicates one Transplanting.

EVERGREENS—Continued

Variety	10	100	1000
Retinospora Obtusa Compacta			
A robust dwarf form, in which the stem is much divided at the base. The branches are short, numerous and crowded with foliage of bluish green. Semi-hardy.			
6-8 inch x Once Transplanted—Bedded Stock -----		\$20.00	\$-----
Retinospora Squarrosa			
A pyramidal or rounded head bush, or sometimes small tree, with light bluish green foliage, almost silvery white when young, usually coloring violet in winter. Semi-hardy.			
6-8 inch x Once Transplanted—Bedded Stock -----		20.00	-----
*Taxus Canadensis (American Yew)			
A valuable dwarf Evergreen, seldom ever growing more than two to three feet above the ground. Has densely clothed dark green foliage. Particularly beautiful in autumn when loaded with scarlet colored fruits. Thrives well in shade. Can be trimmed to any desired shape. Very hardy. Sometimes called Canadian Yew.			
10-12 inch x Once Transplanted—Bedded Stock -----		15.00	125.00
*Taxus Cuspidata (Japanese Yew)			
A distinctly valuable Yew, growing 40 to 50 feet high. Under cultivation, somewhat smaller. Has been cultivated throughout Japan from time immemorial, and introduced into America many years ago, having taken its place as one of the most noteworthy and valuable on the entire list, originating in the cold high altitudes of Northern Japan from where we obtain our seed. It is found fully able to successfully withstand extremes of heat and cold in America. Grows close, upright and compact. Foliage dark green, fruit bright scarlet.			
6-8 inch x Once Transplanted—Bedded Stock -----		30.00	-----
Taxus Repandens (Spreading English Yew)			
A dwarf spreading variety, excellent for edging, grouping and covering banks. Foliage lustrous green. Not hardy in the North, but does well in mild climates.			
6-8 inch x Once Transplanted—Bedded Stock -----		25.00	-----
Thuja Biota Orientalis (Chinese Arbor Vitae) (See Biota Orientalis)			

AMERICAN ARBOR VITAE—(White Cedar)

(Thuja Occidentalis)

Being the leading and popular Evergreen hedge plant, we grow this variety in large quantities and can furnish the twice transplanted sizes in car load lots. This species is also used as the understock for grafting all the different varieties of Thuja. For this purpose the heavier grades of seedlings or the once transplanted size is mainly used. Our annual culture of seedlings reaches several hundred thousand. Growing over such a wide range in its native growths, some trees are open growing and undesirable, but we are careful to obtain our seed from Northern Wisconsin, producing stock of absolute hardness, good green color and compact habit of growth.

2-3 feet xx " " -----	3.75	27.00	-----

Variety	10	100	1000
Thuja Occidentalis Compacta (Parson's Compacta Arbor Vitae)			
There is a considerable mixture in this variety in nurseries throughout the country, but we continue to confine our propagation to the true Parson's form originated by Parsons. It is of slow growth, broad and compact and very hardy, of charming oval form.			
6-8 inch x Once Transplanted—Bedded Stock -----	\$-----	\$20.00	\$160.00
12-18 " xx Twice Transplanted—From Field Rows -----	6.00	50.00	-----
Thuja Occidentalis Douglassi Aurea			
A really valuable Golden form originated by Robert H. Douglas. A good golden color, not so bright as Peabody's, but a superior grower forming a broad bushy heavy specimen.			
12-18 inch xx Twice Transplanted—From Field Rows -----	8.50	80.00	-----
Thuja Occidentalis Douglassi Pyramidalis			
A comparatively new variety, chiefly valuable on account of its crested foliage, deep dark green in color. Reaches a height of 12 to 15 feet.			
12-18 inch xx Twice Transplanted—From Field Rows -----	8.00	70.00	-----
Thuja Occidentalis Ellwangeriana (Tom Thumb Arbor Vitae)			
A low broad pyramid, with the slender branches clothed with two kinds of foliage, juvenile and adult. A very interesting and valuable variety, being an intermediate form between the variety Ericoides and the type.			
6-8 inch x Once Transplanted—Bedded Stock -----		20.00	-----
Thuja Occidentalis Gallica (Glossy Winter Green Color)			
A new introduction, not fully tested but looks very promising.			
6-8 inch x Once Transplanted—Bedded Stock -----		20.00	-----

o—Indicates never Transplanted. Suitable for Bedding Out.

Each x—Indicates one Transplanting.

EVERGREENS—Continued

Variety	10	100	1000
Thuya Occidentalis Globosa Nova A valuable new variety fully tested. Round bushy and compact. Good green color, vary hardy. On account of its many new qualities, is bound to supersede many of the so-called globosa forms.			
6-8 inch x Once Transplanted—Bedded Stock	\$----	\$20.00	\$-----
Thuya Occidentalis Hoveyi A semi-dwarf, compact grower. Foliage dark green. Our stock is guaranteed true strain, which we have been growing for a great many years. Very hardy.			
6-8 inch x Once Transplanted—Bedded Stock	----	20.00	-----
Thuya Occidentalis Lutea (Peabody's Golden Arbor Vitae) A distinct golden type, which we have been able to improve considerably by closer selection, propagating only the brightest golden color, producing plants of exceptional merit. Rather slender in habit, reaching 12 to 15 feet high with a diameter of 2 to 2½ feet.			
10-12 inch xx Twice Transplanted—From Field Rows	----	7.50	60.00 -----
Thuya Occidentalis Pyramidalis (Hill's Pyramidal Arbor Vitae) Unfortunately many inferior types are on the market. Our carefully selected strain which we have improved through years of careful selection and propagation, is of noteworthy value, being the genuine narrow pyramidal type, retaining its deep green color, summer and winter. Being an especially hardy, vigorous grower, forming a compact, narrow column of dense, dark green foliage. (Please note that our strain of Pyramidal Arbor Vitae does not brown, but retains its bright green color throughout the entire year.)			
8-10 inch x Once Transplanted—Bedded Stock	-----	17.50	165.00
Thuya Occidentalis Spicata Alba (Hill's White Tipped Arbor Vitae) Tips of young shoots creamy white. Very desirable.			
6-8 inch x Once Transplanted—Bedded Stock	-----	20.00	-----
Thuya Occidentalis Wareana Siberica (Siberian Arbor Vitae) This well known variety is well worthy of its wide popularity, combining as it does excessive hardness, regular conical outline, and a peculiar dark green and remarkably dense foliage. Very compact grower.			
6-8 inch x Once Transplanted—Bedded Stock	-----	17.50	160.00
Thuya Occidentalis Woodwardi (Woodward's Globe Arbor Vitae) Without doubt one of the best globe forms on the list. Originated and introduced by Mr. Jacob Manning, Proprietor of the Reading Nurseries, Reading, Massachusetts, and named after his son, J. Woodward Manning. A few plants presented by the introducer shortly before his death to D. Hill, forms the basis of our stock. Therefore, we can justly say that our stock is the true strain.			
6-8 inch x Once Transplanted—Bedded Stock	-----	15.00	130.00
Tsuga Canadensis (Hemlock)—True Northern Type Owing to the fact that the botanical name of Hemlock is known to some as Abies and others as Tsuga, we have listed under both, and the description under Abies Tsuga Canadensis on page 3 will apply equally to this.			
6-8 inch x Once Transplanted—Bedded Stock	-----	18.00	165.00
8-10 " " " " "	-----	20.00	185.00

Once Transplanted Evergreens

For Lining or Bedding Out

[illegible]

Each x—Indicates one Transplanting.

Twice Transplanted Evergreens

For Lining Out

The sizes offered here are suitable to line out directly into open field rows. They have been growing in field rows in the nursery and are strong and thrifty.

Each x—Indicates one Transplanting.

Orders for Twice Transplanted Stock must call for at least 10 of any one variety and size.

Shade Trees, Shrubs and Vines

LINING OUT STOCK—Continued

Variety	Size	100	1000
Morus Tatarica (Russian Mulberry) -----	(1 Trans. x) 10-12 inch	\$7.50	\$-----
Philadelphus Coronarius Grandiflora (Large Flowering Mock Orange) -----	10-12 "	9.00	75.00
Platanus Orientalis (Oriental Plane) -----	10-12 "	9.00	75.00
Populus Maximowiczii -----	6-12 "	7.50	60.00
A Poplar recently introduced from Asia. Attaining a height of 100 feet. Very desirable.			
Populus Nigra Italica (Lombardy Poplar) -----	18-24 "	6.00	50.00
Prunus (Amygdalus) Davidiana -----	(Dia.) 2/16-3/16 "	7.00	60.00
See Description on This Variety Under Fruit Tree Stocks at Bottom of Page 19.			
Prunus Pissardi (Purple Leaved Plum) (Grafts) -----	18-24 "	35.00	-----
Pyrus Communis (French Pear) -----	(Dia.) 2/16-3/16 "	6.00	50.00
An understock—Grown from seed collected in northern Japan and recognized as being very resistant to blight.			
Quercus Alba (White Oak) -----	10-12 "	7.50	60.00
Quercus Coccinea (Scarlet Oak) -----	10-12 "	9.00	75.00
Quercus Macrocarpa (Bur Oak) -----	10-12 "	7.50	60.00
Quercus Rubra (American Red Oak) -----	10-12 "	7.50	60.00
Best strains of Red Oak are native of northern Michigan from where we obtain our seed, producing trees of exceptional merit and hardness.			
Rosea Acicularis (American Prickley Rose) -----	10-12 "	7.50	-----
Rosea Blanda (Meadow Rose) -----	10-12 "	7.50	-----
Rosea Multiflora (Japanese Climbing Rose) -----	10-12 "	9.00	-----
Rosea Rubiginosa (Sweet Brier) -----	6-8 "	5.00	40.00
Valuable upright variety with numerous prickly branches. Native of Europe. Leaves, bright green. Fruit, orange, red or scarlet. Our stock is extra fine this season.			
Rosea Setigera (Prairie Rose) -----	6-8 "	5.00	37.50
A noteworthy, handsome variety. Grows naturally from Canada to Florida. Flowers, deep rose in great profusion. Fruits bright red, long persistent. Very ornamental and desirable. One of the hardiest Roses.			
Salix Alba (White Willow) -----	18-24 "	5.00	37.50
Silky gray foliage with yellowish brown bark. Height 80 feet.			
Salix Babylonica (Weeping Willow) -----	18-24 "	5.00	37.50
Weeping habit. Grows 30 to 40 feet high. Olive green branches.			
Salix Diamond (Diamond Willow) -----	18-24 "	5.00	37.50
Salix Elegantisima (Thurlo w's Weeping Willow) -----	12-18 "	5.00	37.50
" " " " " " -----	18-24 "	6.00	50.00
Similar to Babylonica, but more spreading. Branches long and pendulous. Yellow green bark. Grows 30 to 40 feet high.			
Salix Matsudana (Dry Land Willow) -----	18-24 "	5.00	37.50
A valuable introduction from China. Strong growing bush of upright habit, with smooth greenish branches tinged with yellowish red. Occurs on dry lands, requiring no water beyond the scanty summer rainfall.			
Salix Niobe (Golden Bark Weeping Willow) -----	18-24 "	5.00	37.50
A weeping variety with unusually bright golden bark. Very striking.			
Salix North Star -----	18-24 "	5.00	37.50
Unusually choice weeping variety with blood red bark. A new introduction that is very hardy.			
Salix Pentandra (Bay or Laurel Leaved Willow) -----	18-24 "	5.00	37.50
Leaves very large, dark green and shiny. Bark, light chestnut brown. Shrub or small tree 8 to 20 feet high.			
Salix Ural (Ural Willow) -----	12-18 "	5.00	37.50
" " " " " " -----	18-24 "	6.00	50.00
Salix Vitellina (Russian Golden Weeping Willow) -----	18-24 "	5.00	37.50
Large tree with bright yellow bark. Very conspicuous in winter.			
Sambucus Canadensis Aurea (Golden Elder) -----	12-18 "	7.50	60.00
The strain we offer is of unusually fine golden color.			
Sambucus Nigra Laciniata (Cut Leaved Elder) -----	12-18 "	7.50	60.00
Sorbus Americana (American Mountain Ash) -----	10-12 "	5.00	37.50
" " " " " " -----	12-18 "	6.00	50.00
Ours is the true native variety propagated from northern stock, having berries of striking bright red color, produced in great profusion in unusually large clusters.			
Spirea Opulifolia (Ninebark Spirea) -----	10-12 "	6.00	45.00
Spirea Van Houttei (Bridal Wreath) -----	10-12 "	6.00	50.00
We propagate this variety on an extensive scale, and our plants are extra fine, strong and well rooted, from carefully selected hardwood cuttings.			
Symphoricarpos Racemosus Alba (White Snowberry) -----	10-12 "	7.50	60.00
Syringa Vulgaris (Purple Lilac) -----	4-6 "	6.00	50.00
" " " " " " -----	6-8 "	7.50	60.00
A popular well known ornamental shrub. It is also used extensively as an understock for budding or grafting the named Hybrids.			

Orders should call for multiples of 50.

50 of same variety and size at the 100 rate; 600 at the 1,000 rate.

LINING OUT STOCK—Continued

Variety	Size	100	1000
Syringa Vulgaris Michel Buchner (Double, Pale Purple)-----	10-12 inch	\$35.00	\$-----
Tilia Americana (American Linden or Basswood) -----	8-10 "	6.00	45.00
" " " " " "-----	12-18 "	7.50	60.00
A variety quite scarce because it is hard to propagate, but we have a fair stock this season, which however, is selling rapidly and orders should be placed early.			
Tilia Platyphyllos (European Linden) -----	10-12 "	9.00	75.00
Ulmus Americana (American White Elm) (Whips)--(Trans.)	2-3 feet	9.00	75.00
" " " " " "-----	3-4 "	11.50	100.00
" " " " " "-----	4-6 "	16.50	150.00
" " " " " "-----	6-8 "	40.00	375.00
" " " " " "-----	8-10 "	65.00	-----
Viburnum Americana -----	6-8 inch	7.50	-----
Dark green hairy foliage—large blooms.			
Viburnum Molle (Common Viburnum) ----- (1 Trans. x)	6-8 "	10.00	-----
Viburnum Opulus (Highbush Cranberry) -----	6-8 "	7.50	60.00
Selected strain, with large clusters of scarlet berries.			
Weigela Rosea ----- (1 Trans. x)	8-10 "	9.00	75.00
Large showy rose colored flowers produced abundantly.			
Wistaria Chinensis -----	6-8 "	7.50	60.00
A rapid growing vine with purple flowers borne in drooping clusters 7 to 12 inches long.			
Wistaria Chinensis ----- (1 Trans. x)	6-8 "	10.00	-----

Each x—Indicates one transplanting.

Orders should call for multiples of 50.

50 of same variety and size at 100 rate; 500 at 1000 rate.

EVERGREEN VINES AND GROUND COVER

Variety	Size	100	1000
Evonymus Radicans Acutus -----2 yr. (1 Trans. x)	12-15 incl	\$13.00	\$120.00
Distinguished on account of its sharp pointed leaves. A good Evergreen Vine. Very attractive. Our stock is extra fine.			
Evonymus Radicans Carrierei -----2 yr. (1 Trans. x)	12-15 inch	15.00	135.00
A good climber—spreading in habit with handsome glossy foliage.			
Evonymus Radicans Vegetus -----2 yr. (1 Trans. x)	4-6 "	15.00	-----
A pretty trailing Evergreen vine. Produces an abundance of showy red fruits and yellow pods.			
Pachysandra Terminalis (Japanese Spurge)----- (1 Trans. x)	4-6 inch	8.00	70.00
A splendid Evergreen ground cover with thick glossy foliage, forming a dense mat, making a good low growing cover plant. Excellent for edging. Does well in dense shade. Hardy.			

FRUIT TREE STOCKS

Variety	Size	100	1000
Prunus (Amygdalus) Davidiana ----- (Dia.)	2/16-3/16 inch	\$7.00	\$60.00
The discovery by Frank N. Meyer that this species of wild peach which produces inedible fruits has been used probably for centuries in China as a stock for many stone fruits, has led to its extensive trial for the same purpose in America. Several plantings of commercial peaches, plums, apricots, and almonds budded upon this as a stock have reached bearing age in California and Texas and are unusually promising. Owing to the resistance to cold, drought and alkali of this new stock, and the ease with which it can be budded, it appears probable, if supplies of the seed can be raised, that it will form the root system of large commercial peach plantings in California, Utah and Texas. In Oregon the largest nurserymen are attracted by the ease with which it can be worked, and in Minnesota and Iowa trees of it have stood untouched by the low temperatures, even 40 degrees F., which have killed commercial varieties to the ground. It cannot be expected to fruit in any region visited by late frosts, as its buds swell easily in warm, damp weather.			
Pyrus Communis (French Pear) ----- (Dia.)	2/16-3/16 inch	6.00	50.00
Understock—Grown from seed collected in northern Japan and recognized as being very resistant to blight.			

AMERICAN WHITE ELM (Ulmus Americana)

Perhaps in no other tree are there a greater number of types or mixtures. This is true, probably owing to the fact that American White Elm very readily hybridizes with other Elms in the locality. Realizing this fact, nurserymen should use particular care in selecting their planting stock of Elms. The trees we offer are grown from seed collected right here in the city of Dundee from the true Northern type of straight stemmed, vase like specimens, that are growing entirely apart from any possible mixture with other types. It will pay you to grow trees of this kind. We are making some very attractive prices.

	100	1000
2 to 3 feet (Whips) -----	Transplanted \$ 9.00	\$ 75.00
3 to 4 feet (Whips) -----	Transplanted 11.50	100.00
4 to 6 feet (Branched) -----	Transplanted 16.50	150.00
6 to 8 feet (Branched) -----	Transplanted 40.00	375.00

Evergreens for Tubbing

A Profitable Line to Handle

With the present scarcity and high prices of boxwoods, Hill's Evergreens for tubbing sell themselves. Our tubbing Evergreens are especially grown, compact and well formed, suitable for the very best trade.

Pyramidal Arbor Vitae, dark green pyramid, is the leader, Red Cedar is also preferred by many florists. We offer both varieties.

Trees are furnished Balled and Burlapped (B&B) and come singly or in pairs. Note: Retail prices average $2\frac{1}{2}$ times the wholesale rates listed below:

		Size Feet	Each	Matched Pairs
Pyramidal Arbor Vitae (Thuya) B&B	2	2	\$3.50	\$ 6.50
	B&B	3	4.50	8.50
Red Cedar (Juniperus)	B&B	3	5.00	9.50
	B&B	4	8.00	15.50
Sheared Globes (Thuya)	B&B	1 $\frac{1}{4}$ x1 $\frac{1}{4}$	4.25	8.00

Window Box Evergreens

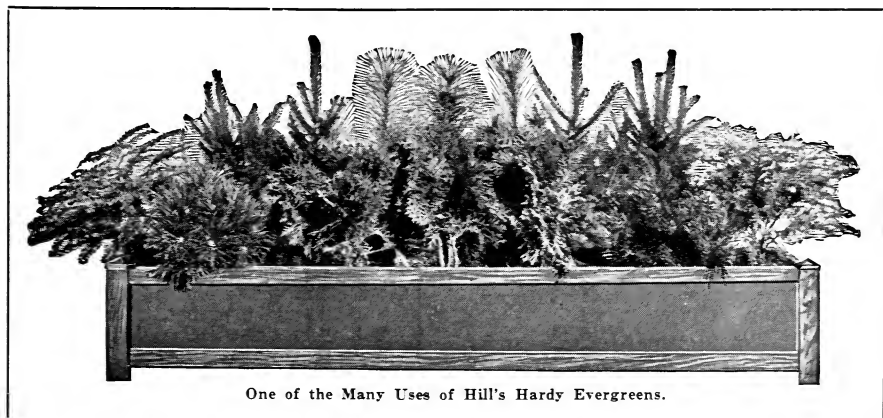

For Summer or Winter Decoration

Notice to the Trade:

We wish to call attention to a substantial REDUCTION IN PRICES of Hill's Specimen Evergreens, effective with this catalog (Spring 1921).

During the period of the war, prices of Evergreens were but slightly increased compared to advances in other lines of business. While as yet there is no noticeable drop in the cost of growing nursery stock, we wish to do our part in encouraging the present tendency in all lines of business for readjustment of prices and take this practical means of doing so. Prices in this list are effective up until June 1, 1921.

NEW

Hill's Silver Juniper

(Juniperus Scopulorum)

A comparatively new introduction from the Rocky Mountains by D. Hill, which we have during the past few years thoroughly tested in various sections of the country and found entirely satisfactory. It is absolutely hardy in the North and also well adapted to Southern conditions. Many testimonials from leading firms and individuals confirm its worth. It is a beautiful, symmetrical, narrow pyramidal Juniper with the silvery blue color of the Elue Spruce; good grower and can be propagated from seed or rooted cuttings. Two additional distinct types are also being propagated and will be ready for distribution soon. Secure a stock of these trees now and learn more about the coming Silver Juniper.

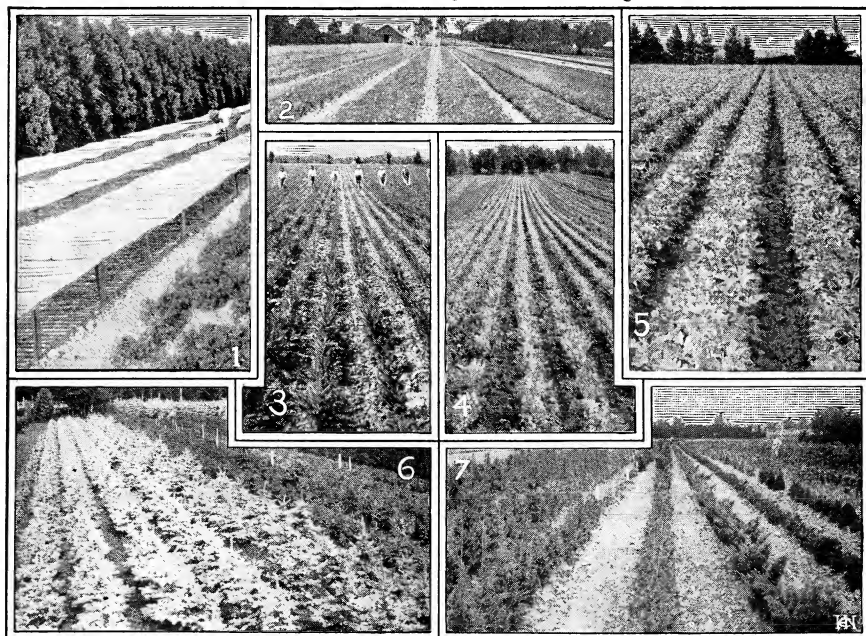

Size	Each	10

How to Reach Our Nursery

Visitors are always welcome. We are conveniently located only 42 miles north west of Chicago.

When coming by the way of Chicago, you are directed to the C. & N. W. Depot on Madison Street, from where it is an interesting ride of one hour and thirty minutes direct to Dundee.

For an hourly service from Chicago, take the A., E. & C. Electric Line at Wells Street and Jackson Boulevard, direct to Elgin, transferring to the Dundee-Carpentersville car, getting off at Stop No. 4, from where it is but a two-minute walk direct to our office, which is located right on the nursery grounds.

Paved road from Chicago brings you direct to our Nursery
